

OPERATION I-GO

D3A2 Val dive-bombers warm up at Vunakanau. These aircraft used for the Operation I-Go are early Model 22s, as indicated by the fact they still have telescopic gunsights.

Taken at the mission briefing, these D3A2 crews from an unidentified unit are about to head for Oro Bay.

A 7th FS participant on 11 April was this P-40E-1 seen at Rorona prior to its transfer to Dobodura.
